Professional Summary

Versatile full-stack engineer and early-stage CTO with 5 years of coding experience and a B.S. in Software Engineering. Proven ability to lead development across web, mobile, backend, and infrastructure layers using modern tools like Go, React, PostgreSQL, Docker, and AWS. Adept at designing scalable APIs, setting up CI/CD pipelines, and integrating third-party services like Stripe, Twilio, and WhatsApp. Built and deployed secure production systems for startups, contract roles, and personal ventures. Currently architecting a booking and membership platform as the sole technical founder of an early-stage startup, with plans to launch cross-platform apps. Passionate about shipping clean, maintainable code and driving end-to-end product development.

Technical Skills

cloud: AWS EC2, AWS ECR, AWS Route 53, AWS S3, AWS RDS

devops: Docker, Terraform, NGINX, GitHub Actions

databases: PostgreSQL, MongoDB, MySQL, MariaDB

languages: Go, JavaScript, TypeScript

utilities: Postman, Linux, JetBrains, Shell Scripting, GitHub

frameworks_libraries: React, React Native, Express, Node.js, Vite

Professional Experience

CTO & Lead Engineer | Limitless Hoops (Startup) (Denver, CO)

May 2025 - Present

- Leading development of a full-stack booking and membership platform, architected from the ground up using Go, Fiber, GORM, and PostgreSQL.
- Built and tested core backend services, including user authentication, admin roles, child-linked profiles, and tiered memberships.
- Designed and implemented CI/CD pipelines with GitHub Actions and Docker, deployed via Terraform to AWS.
- Planning and leading development of the web-based admin portal and user dashboard (React + TypeScript), as well as mobile apps using React Native.
- Integrating third-party systems including Stripe (payments), Twilio (voice/SMS), and WhatsApp (notifications) to streamline scheduling and communication.
- Driving product architecture, feature planning, and infrastructure setup as the sole technical founder.

Full Stack Engineer | Impression LLC (Startup) (Remote)

May 2024 - May 2025

- Developed cross-platform mobile app with React Native, Node.js, and Express.js
- Built and maintained backend API with MongoDB integration
- Created internal admin panel and landing page using React, Vite, and Node.js
- Led DevOps setup using Docker, GitHub, and Linux

Associate Java Developer (Pre-training) | Revature (Remote)

Dec 2024 - Feb 2025

- Completed Revature's pre-training program in Java, Spring Boot, Javalin, REST APIs, and SQL
- Built backend services and APIs using Java frameworks and SQL databases
- Collaborated in agile project teams simulating real-world development
- Awaiting placement into full-time client engagement

Software Engineer (Contract) | UpNCoding (Remote)

Dec 2023 - Jun 2024

- Built a tourism app using Laravel, PHP, and MariaDB for the Adirondack region
- Developed Android/iOS apps using Kotlin and Swift using Android Studio and XCode
- Created internal admin panel with React and TypeScript
- Used Docker for containerized development

IT Technician (Temporary) | Adirondack Techs (Saint Regis Falls, NY)

Jul 2024 - Sep 2024

- Installed and maintained POS systems, servers, and network equipment
- Troubleshoot PCs, mobile devices, and security hardware onsite
- Configured Windows Server, macOS, and IP phone systems

Projects

Impression Art App

React Native, MongoDB, Express, with admin panel and landing site

UpNCoding Tourism App

Laravel backend, MariaDB, React-based admin panel for Android/iOS

Personal Site

Built with Golang (GORM, Fiber), React, Terraform, and AWS

Revature Projects

Java + Spring Boot APIs and backend systems from training

Limitless Hoops Services

Go backend, PostgreSQL, Docker, Terraform, AWS; React/React Native admin & user apps; Stripe, Twilio, WhatsApp integrations

Education

B.S. in Software Engineering | Southern New Hampshire University

Golang Bootcamp Certification | UpNCoding
