SKILLS

Languages:	Go (Golang), TypeScript/JavaScript, Dart, SQL, Bash
Backend:	Fiber (Go), GORM, Node.js, Express.js
Frontend & Mobile:	React, Flutter, Tailwind CSS
Databases:	PostgreSQL, MariaDB, SQLite
Cloud & DevOps:	AWS, Docker, Terraform, GitHub Actions, Linux
Security & Architecture:	RBAC (Role-Based Access Control), Penetration Testing, COPPA Compliance, System Architecture

PROFESSIONAL EXPERIENCE

Limitless Hoops Mar 2025 - Present

Principal Software Engineer (Remote)

- Architected a comprehensive, cross-platform administrative ecosystem using Flutter and Dart, centralizing database management, dynamic web content, and critical system state controls.
- Engineered backend infrastructure with a strict mandate on cybersecurity and federal COPPA compliance, implementing advanced Role-Based Access Control (RBAC) and emergency system switches.
- Developed and integrated a scalable, multi-channel notification engine (In-App, Email, SMS) and an internal employee mail client to streamline corporate communications.
- Built and deployed a high-performance, SEO-optimized consumer landing page utilizing React and JavaScript to drive initial user acquisition and brand visibility.

UpNCoding Apr 2024 - Present

Lead Software Engineer (Remote)

- Collaborated directly with external stakeholders and government officials to translate complex business requirements into scalable product roadmaps and technical specifications.
- Architected and delivered multiple production-ready platforms utilizing React, TypeScript, and Flutter, modernizing legacy infrastructure and launching greenfield digital initiatives.

PROJECTS

Roost ADK Rail Trail App Mar 2025 - Apr 2026

A cross-platform mobile application delivering real-time navigation, dynamic event data, and offline trail maps for the 34-mile Adirondack Rail Trail.

- Developed in partnership with the Regional Office of Sustainable Tourism (ROOST) as the official digital guide for the 34-mile Adirondack Rail Trail.
- Integrated custom Google Maps and OpenStreetMap APIs to deliver robust offline caching and real-time GPS tracking in remote areas.
- Implemented a dynamic data ingestion pipeline via client-managed JSON endpoints to seamlessly update live events and directories without app store updates.
- Successfully supported nearly 1,000 concurrent users within weeks of launch while maintaining a perfect 5.0 rating on the iOS App Store.

Tools: Flutter, Dart, Go, AWS, iOS & Android

Sustainability Toolkit Oct 2025 - Jun 2026

A high-performance Single Page Application (SPA) built to educate regional residents on municipal sustainability and environmental initiatives.

- Engineered a high-performance Single Page Application (SPA) educating regional residents on municipal sustainability practices.
- Architected the frontend from the ground up using React and TypeScript, prioritizing load times and strict ADA / Section 508 accessibility compliance.
- Translated complex municipal requirements from the B2G contract into a clean, modern, and engaging user interface.

Tools: React, TypeScript, Tailwind CSS

Franklin County Community Services Oct 2025 - Jun 2026

A comprehensive modernization of a critical county government web portal, engineered for high performance and universal accessibility.

-

- Spearheaded the complete architectural redesign and modernization of the critical county government web portal using React and TypeScript.
- Replaced outdated municipal infrastructure with a highly responsive, modern web experience.
 - Placed major technical focus on strict ADA and WCAG web accessibility compliance, ensuring public health resources and services are navigable for all residents.
- Tools:** React, TypeScript, HTML, Tailwind CSS

EDUCATION

UpNCoding Hack The Box <i>CPTS (Certified Penetration Testing Specialist)</i>	Feb 2026 - May 2026
UpNCoding North Country Community College <i>Full Stack Development & Cloud Architecture</i>	Apr 2023 - Jul 2023
Southern New Hampshire University <i>B.S. in Computer Science (Software Engineering Focus)</i>	Jul 2020 - Apr 2024
