PROFESSIONAL EXPERIENCE

Limitless Hoops Apr 2025 - Present
CTO & Lead Engineer Remote

- Sole Technical Founder & Architect spearheading the design and development of a comprehensive suite of products for a high-growth youth basketball startup.
- Architecting scalable backend systems for booking management, live game tracking, and secure payment processing using Go, Fiber, and third-party APIs like Stripe.
- Developing cross-platform solutions, including custom browser and mobile applications, integrating complex features such as membership-locked functionality, seasonal logic, and real-time user stats.
- Implementing robust integration with external services such as WhatsApp for communications and Stripe for payments, ensuring seamless user experiences.

UpNCoding Apr 2024 - Present
Lead Engineer Remote

- Serving as an Independent Contractor & Lead Engineer, guiding development teams through the full software development lifecycle (SDLC) across multiple client engagements.
- Driving product management initiatives, from gathering initial project requirements and leading stakeholder meetings to defining technical specifications and delivery timelines.
- Mentoring and leading developers, fostering best practices in code quality, architecture, and agile methodologies to deliver high-quality solutions on schedule.

PROJECTS

Franklin County Sustainability Toolkit

A single-page educational hub that highlights sustainability initiatives and resources for public learning.
Tech Stack: React, TypeScript, Tailwind CSS

Franklin County Community Services

A redesigned, accessibility-first website that modernizes the organization's online presence and improves usability for the community.
Tech Stack: React, TypeScript, Tailwind CSS

Roost ADK Rail Trail

A mobile app that helps users navigate the Tupper Lake–Lake Placid rail trail with map views, offline access, and curated points of interest.
Tech Stack: Flutter, Dart
